

man-imal

One world, one health

Innovative graduate curriculum based on the
“One World, One Health” concept
promoted by the WHO, FAO and OIE

2nd-year Master's

From Animal to man:
Analysing and Managing Health
and Food Risks

In partnership with

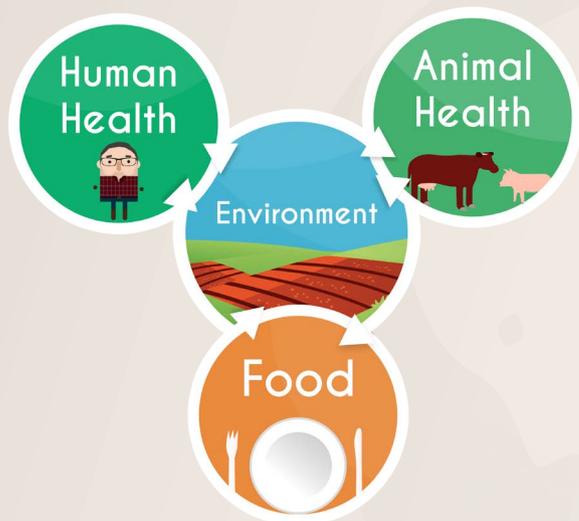

An IDEFI Laureate Programme
(Initiatives for Excellence in Innovative Training)

Why?

Because in a globalised, industrialised society with an increasing number of stakeholders and regulations, production chains are becoming more and more complex.

Based on the “One World, One Health” concept, the **manimal** programme seeks to answer these changes thanks to a global and cross-disciplinary approach integrating:

To cope with these new issues on Public Health and Food Safety, the 2nd-Year Master’s “From Animal to Man: Analysing and Managing Health and Food Risks” trains executives to new job profiles.

For who?

This course trains students from various fields:

Medicine
Pharmacy

Veterinary sciences

Life sciences

Agricultural or
Food-Processing
Engineering

How?

► The Cross-Disciplinary Approach is ensured by:

- A partnership between **4** renowned higher education institutions:

Veterinary public health, health and animal farming, food safety

UN/UA: Food and health, public health

ESA: Agrofood, agriculture and sustainable system conception engineering

- Interdisciplinary teaching built on **5** Teaching Units (*see detailed diagram of the 1st semester*).

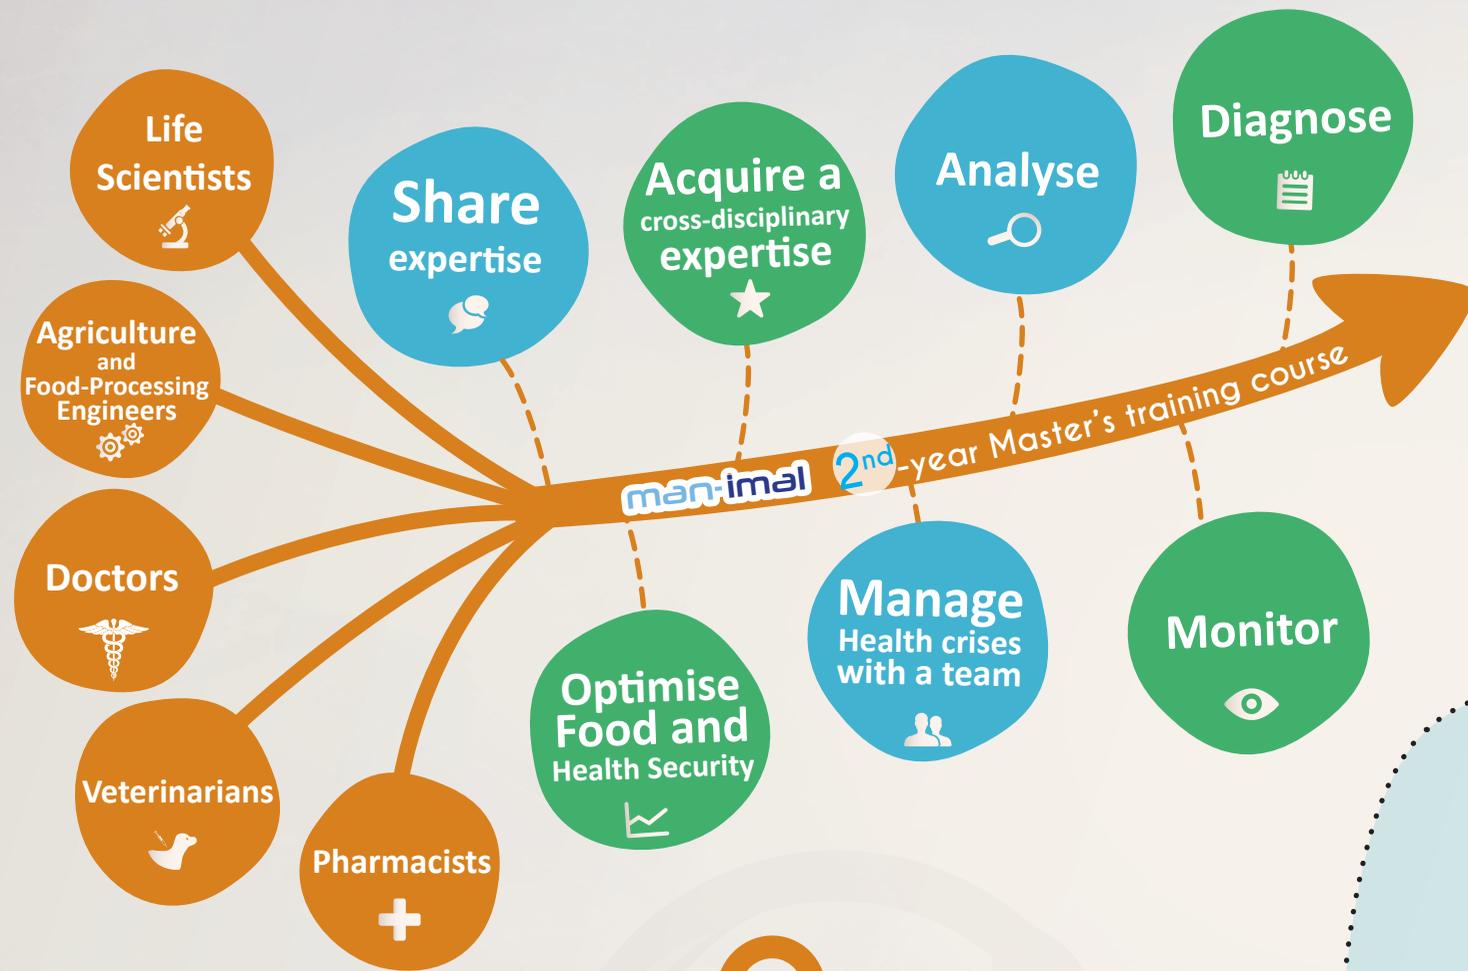

► The Multicultural Approach is ensured by:

- The recruitment of students from **all over the world**
- The lectures taught entirely in **English**

► The practice training to professionalise students is guaranteed by:

- **Practical Tutored Projects** in relation to the professional world
- A 5-to-6 month **internship** previously defined by the student and professors according to the student’s precise professional project
- **An active and customised pedagogy** relying on the use of audiovisual and multimedia technologies in teaching
- **Courses taught by experts:** Doctors, Veterinarians, Food-processing Engineers, Researchers, Experts, and Industrialists...

The training programme takes place in Nantes, FRANCE

Job openings

Private sector / Public sector

- ▶ **Consultants and experts** for the Ministry of Health, health risk assessment agencies in France and in Europe, within food-processing and pharmaceutical companies, research and development offices...
- ▶ **Senior Level Scientist** for the assessment and expertise of Health and Food Risks, within agricultural organisations, association of farmers, for national and international public and parapublic health organisations, or institutions taking part in Public Health Risk Assessment (EFSA, Anses, InVS, OIE, FAO...)...
- ▶ **Researchers** in the field of Zoonosis, Human Nutrition, Animal and Human Health, R&D directors...

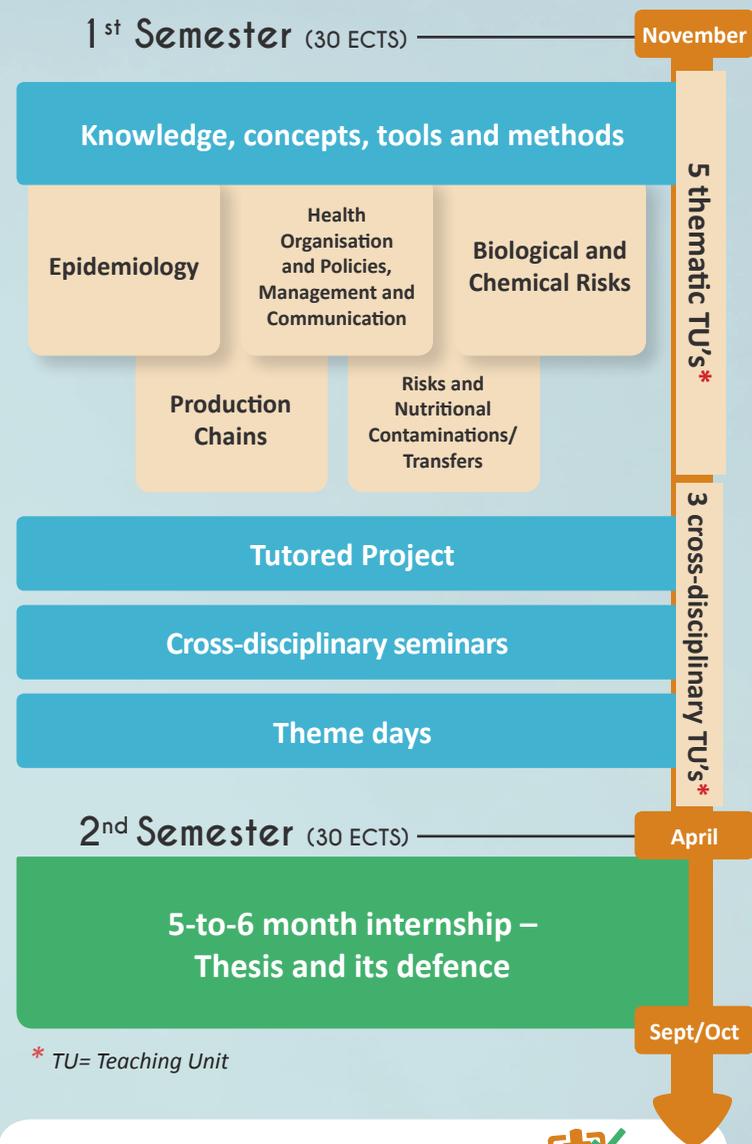

Organisation of the training programme

The **first semester** is dedicated to acquiring theoretical knowledge, tools and methods. Cross-disciplinary courses are provided to develop:

- The ability to work as a multidisciplinary team
- Skills to identify the complementary partners required for case solving

During the **second semester**, students do an internship, whose subject is directly related to the **man-imal** themes, in a **professional environment, in France or abroad**.

This internship leads to the completion and defence of a Master's thesis.

* TU= Teaching Unit

Evaluation methods

- **Ongoing evaluations :**
 - Individual: contribution and foundational knowledge
 - Group: case scenario group work and tutored project
- **Internship evaluation :** completion and defense of a thesis.

How to apply ?

Admission criteria

To apply for the 2nd-year Master's degree, students **must**:

▶ **Hold a Bachelors' degree**

▶ **Have completed at least one year of postgraduate studies (60 ECTS) in:**

- Pharmaceutical or biological sciences
- Medical studies
- Veterinary studies
- Food-processing or agricultural engineering

Application session from:

Monday 19th December 2016 to Monday 5th June 2017

*Application procedure on
